PROFILE

I have recently graduated from the Code Institute's full stack developer course with the ultimate aim of becoming a junior full stack developer. With a lot of self study under my belt I have projects written in a variety of popular front end and back end languages.

SKILLS

| | | | | |
|----------------|----------------------------|---------|--------|---------------|
| FRONT END | HTML | CSS | | |
| FRAMEWORKS | Bootstrap4, Materialize | Jasmine | Django | Heroku (PaaS) |
| BACK END | Javascript | Python | Java | mongoDB |
| UI/UX | Balsamiq | | | |
| SOURCE CONTROL | Git | | | |

PROJECTS

TITLE Dom's Burger Joint

DESCRIPTION

A full stack website for a typical online food delivery service, including sqlite database. The project includes all CRUD operations on food order objects. The site features a fully secure checkout (Stripe payments API), that utilises webhooks and email confirmation for the user's successful orders.

It also verifies the customer's postcode is valid by utilising the google maps' distance matrix API. The app also features a member sign up page allowing the user to benefit from a reward scheme.

TECHNOLOGIES Using JavaScript, HTML, CSS, Python, Django, Materialize, Heroku & mongoDB.

HEROKU <https://doms-burger-joint.herokuapp.com/>

TITLE Recomovie

DESCRIPTION

A data-centric dynamic app for users to build profiles and share their favourite movies through ratings and reviews given. User profiles are visible and if logged in can be fully edited through CRUD operations on reviews. Basic Login - plain text password storage. Data stored in mongoDB (Atlas) and queries performed via Python Flask control. Connects to OMDB API for film validation.

TECHNOLOGIES Using JavaScript, HTML, CSS, jQuery, Python, Flask (Micro Framework), Materialize, Heroku & mongoDB.

EDUCATION

Code Institute - Full Stack Diploma Second Class Honours

University of Sheffield - BsC Theoretical Physics 2:2 (2011)

Wootton Upper School - A Levels - French C, Further Maths B, Physics B, Maths A.

EMPLOYMENT POSITIONS

PERSONAL TRAINER

Third Space Tower Bridge, 2b More London Riverside, London SE1 2AP

March 2018 – Current date

Responsibilities include maximising client's welfare & enjoyment throughout the session. Writing training programs that meet the client's needs whilst at the same time working with any injuries or conditions that individual may have. It is a customer facing business meaning over the 8 years in the role I have developed interpersonal skills that allow me to work well with clients during difficult moments or periods of stress in the clients life that I believe will transfer well to any team environment.

Fitness First (Self employed), Aspects Leisure Park, Newnham Avenue, Bedford, MK41 9LW

January 2012 – March 2018

This was very similar to the job listed above in terms of duties however at this stage i was self employed. I held all accountability when it came to setting up client sales and organising paid classes outside of the gym. I managed my own accounts and tax return during this period. Organization was an imperative skill in the day to day running of my business.
